

The Runoff Rundown

Thank you for subscribing,

! Get ready to be inspired to become an advocate for preventing stormwater pollution! By subscribing, you have been added to our mailing list and will be among the first to find out about our monthly stormwater education events, tips you can do around home, and more to Protect Wisconsin's Waterways!

Stormwater 101

Stormwater is runoff from rain or snowmelt that travels through our storm drains into our waterways. Meet our friend, Rain, as she educates you about what is in stormwater and how it can negatively affect our environment.

[Check out Rain in our other videos too!](#)

Rock River Clean Sweep

Protect Wisconsin Waterways teamed up with the Rock River Clean Sweep to continue to protect Wisconsin's natural resources on Saturday, September 9th in three cities: Janesville, Beloit, and Waupun. Featured below is the Waupun Clean Sweep volunteers after they finished cleaning their section of the Rock River. [Read more ...](#)

Become a Wisconsin Waterway Protector!

It takes citizens like you to make our mission possible to protect our rivers, lakes, and streams from harmful stormwater runoff. Pollutants from everyday activities such as lawn mowing and fertilizers, leaf collection, and disposing of pet waste all affect stormwater. By taking the Wisconsin Waterways Protector Pledge, you will help keep our waterways clean. [Yes, I'm ready to take the pledge!](#)

Take

The Pledge

What is the Rock River
Stormwater Group
(RRSG)?
